DETAILED ACTION

Allowable Subject Matter

1. Claims 9 and 14-36 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest one or more of the limitations found in independent claims 9, 17, 21, 25, 29, and 33. U.S. Patent Application Publication No. 2004/0242289 to Jellicoe et al. and U.S. Patent Application Publication No. 2003/0096583 to Watanabe both teach similar systems to that of the present application. However, with respect to independent claims 9, 17, and 21, Jellicoe and Watanabe, as well as the other prior art of record, fail to teach or suggest an antenna system comprising a switch that is responsive to the processing platform to connect the transceiver components to the radiating element at a first feed point to achieve one of a first matched condition and a second matched condition when the movable cover is in the first position, and at a second feed point to achieve the other of the first matched condition and the second matched condition when the movable cover is in the second position. With respect to independent claims 25, 29, and 33, the prior art of record fails to teach or suggest an antenna system comprising a switch that is responsive to the processing platform to ground the radiating element to achieve a planar, inverted-F response for the antenna system when the movable cover is in the first position, and to disconnect ground from the radiating element to achieve a monopole response for the

antenna system when the movable cover is in the second position. Therefore, independent claims 1, 17, 21, 25, 29, and 33, as well as all respective dependent claims, are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
